April 22, 2013

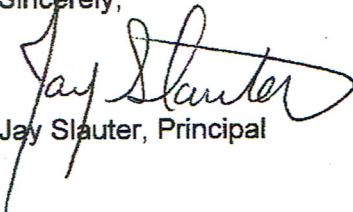

To Whom It May Concern:

This letter is in recommendation of Robert Weiland as a potential member of your organization. I have known Mr. Weiland since August 2012. He has worked as a math tutor during this time at ACE Charter High School. Mr. Weiland has worked not only as a motivated math tutor but also as a contributing member of learning community. He is extremely student oriented in his approach to providing educational services to students. His experience with at risk populations makes Mr. Weiland an excellent choice for a teaching position within any organization.

Mr. Weiland has significant knowledge of math as an engineer. While working with our school, he has learned to use computerized standardized testing such as the NWEA Measures of Academic Progress. Through the use of data and differentiating instruction, Mr. Weiland has been successful in helping student to acquire the needed skills and credits to continue moving toward graduation. Mr. Weiland also takes the time and makes the necessary commitment to ensure that his methods fully address and are aligned with Arizona State standards in math. He is flexible and willing to help out when called on, even though he has served as a tutor rather than as a regular faculty member.

Mr. Weiland is completing his education and working toward becoming a highly qualified, certified math teacher. ACE Charter is an alternative high school and, as a tutor in this environment, Mr. Weiland has gained experience in working with a very diverse, alternative population that fully meets the definition of "at risk" students. Mr. Weiland's experience in many areas of education, both in the classroom and outside, allows him to bring a wealth of knowledge into the school. For these reasons I have no hesitation in recommending that you seriously consider Mr. Weiland's application to become a member of your organization.

Sincerely,

Jay Slauter, Principal
